IUT LOUIS PASTEUR (FRANCE)

- Associate Degree in Physical Measurements

LANGUAGES

- French (Fluent)
- English (C1)
- German (A2)

NOÉ LANTERNIER

FRONTEND DEVELOPER,
UI/UX DESIGNER & STUDENT

PROFILE

Computer Science student with a strong background in low-level programming (C, C++) and modern web development. Currently completing my final year at Epitech in Strasbourg, following an enriching one-year exchange program at Jönköping School of Engineering.

Driven by a strong interest in frontend architecture and UI/UX design, I have developed solid problem-solving and remote teamwork abilities through my projects. I am seeking a full-time or part-time position in Strasbourg or remotely alongside my studies.

WORK EXPERIENCE

- **HandVision** MARCH 2025 - PRESENT
Frontend Developer & UI/UX designer
 - Designed UI/UX for a handball match analysis software using Figma.
 - Built responsive frontends (SCSS, Tailwind) and migrated the architecture from Next.js (TSX) to Svelte.
 - Collaborated in a 100% remote team spanning multiple time zones.
- **MOCLI** MARCH 2025 - AUGUST 2025
Frontend intern
 - Developed and maintained Angular-based web projects.
 - Designed and implemented interactive game mechanics.
 - Created and customized CSS theme templates for various games.
 - Converted the large-screen website into six responsive formats, ensuring optimal display across multiple devices.
- **FIRM service - Socomec** AUGUST 2023 - DECEMBER 2023
IT intern
 - Redesigned and developed technical documentation using HTML, CSS, and JavaScript, focusing on usability and user experience.
 - Optimized an automation process to generate HTML files from XML data using XSLT, improving both efficiency and reliability of the workflow.

TECHNICAL SKILLS

- Programming: C, C++, Python, JavaScript, TypeScript, HTML, SCSS, Tailwind
- Frameworks: Angular, Node.js, Vue.js, Svelte, Next.js
- Tools: Git, VS Code, Figma, Trello
- Design: UI/UX, responsive design
